

Protect Microsoft 365 with OX IT Cyber Protect Cloud

The most reliable and easy-to-use protection built for you. Now with unlimited Acronis Hosted Cloud storage

Why protecting Microsoft 365 data & applications is critical

With more than 130 million active monthly users, Microsoft 365 is rapidly becoming the go-to solution for many organisations that understand the need to secure their critical data.

Today there are many nuances to keeping Microsoft 365 data safe. To start, while Microsoft provides infrastructure resilience, data protection remains your responsibility. Without third-party backup, sensitive business data is at risk from data loss (e.g. accidental deletions & malware attacks). Data breaches are also a big risk due to the rising attack complexity: in 2020, 85% of Microsoft business customers reported an email data breach. That year, Microsoft also reported 1,220 new common vulnerabilities and exposures (CVEs) across their products; while attacks against Microsoft Teams continue to rise.

With OX IT Cyber Protect Cloud for Microsoft 365 you can regain control of your Microsoft 365 data, protect Microsoft 365 mailboxes against modern threats and close vulnerabilities – while preventing exploitation attempts.

Why you should choose OX IT Cyber Protect Cloud for M365

LEVERAGE AGENTLESS BACKUP

Ensure your Microsoft 365 data is backed up and recoverable with best-in class, cloud-to-cloud agentless backup and recovery technologies.

STOP MODERN EMAIL THREATS

Intercept and stop email threats, including Business Email Compromise (BEC), zero-day malware and Advanced Persistent Threats (APTs), before they reach your Microsoft 365 mailboxes – OX IT Cyber Protect Cloud with Advanced Email Security makes it easy.

ADDRESS VULNERABILITIES & PREVENT EXPLOITATION

Monitor all Microsoft products for vulnerabilities and close security gaps promptly with automated patch management that is prioritised by vulnerability criticality. You'll be able to protect remote workers and prevent Microsoft Teams exploitation attempts.

OX IT Solutions Cyber Protect Cloud for Microsoft 365 lets you work worry-free

Access backed-up Microsoft 365 data quickly with easy search capabilities

Keep your business compliant with legal & regulatory mandates

Ensure business continuity & meet shorter RTOs (recovery time objective)

Safeguard Microsoft 365 data, mailboxes & applications from a wide range of threats

EFFORTLESS BACKUP WITH CLOUD DEPLOYMENT

Start quickly with no upfront costs and save on trainings and maintenance. With OX IT Solutions Cyber Protect Cloud you can back up your data from Microsoft data centers directly to highly secure Acronis data centers.

Exchange Online

Protect emails, attachments, contacts, tasks, group mailboxes, archive mailboxes, and calendars.

OneDrive for Business

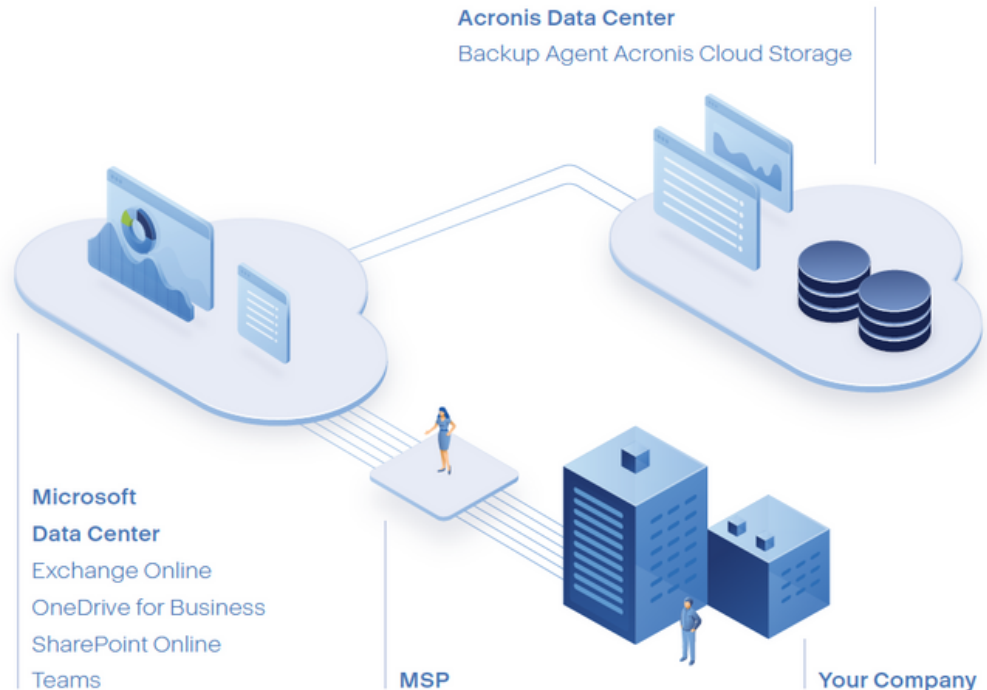

Safeguard files and folders including all access permissions, if necessary.

SharePoint Online

Secure site collections, team sites, communication sites, and all access permissions settings.

Teams

Protect Microsoft Teams data, including team's name, member list, team channels and their content, team mailbox, meetings, and team sites.

KEY FEATURES TO PROTECT YOUR MICROSOFT 365 DATA

One solution for any workload

Save on licensing, education and integration. OX IT Cyber Protect Cloud is a scalable solution that protects any piece of your data across 20+ platforms—physical, virtual, cloud, or mobile.

Quick backup search

Find a file needed in seconds. Enhanced search for mailboxes allows you to search by email subject, recipient, sender, and date. In addition, you can search with word forms or partial information and can also search Teams, OneDrive for Business and SharePoint Online by site item and file name.

Quick granular restore

Avoid client downtime and ensure your business continuity by recovering your data in seconds. You can granularly back up and restore required pieces of data (e.g. emails, files, sites, contacts, attachments).

Powerful status monitoring

Achieve higher levels of transparency and security thanks to advanced reporting capabilities and backup-status monitoring, including widgets, notifications, and alerts for critical events.

Automatic protection for new Microsoft 365 items

Reduce headaches by streamlining backup management for Microsoft 365. New users, groups, and sites are automatically protected.

Multi-level encryption

Safeguard your data with additional security. At-source, enterprise-grade AES-256 encryption protects backups with irreversibly encrypted passwords.
